

Com aqua ~ Aqua Link

Water, essential to our lives, we must cope with well and in a sustainable manner. Especially, cooperation as a means and an end for better water management and environment is to be the base for our well-beings.

Com aqua provides a pool, where people come together like water drops to think how we should cope with water and to be promoted to tailor innovated actions for water. The pool functions as a tank of knowledge, experiences as well as technologies about water and basin management, which lead to review and reorganize the case we are facing to. The main core issue is cooperation of the stakeholders. Drops make water body, which may create pressure and a stream, from which vapor comes up to the air and act freely, and join to drop again.

Com aqua develop the water link of those who are thinking and acting seriously for water. Water cooperation, water link, water harmony, ... combine to **Com aqua**.

Main Activities of **Com aqua**

- To organize events such as symposium, seminar, workshop as well as tours about water,
- To cooperate with local events, meetings and related projects about water organized by other organizations ,
- To make public relations and cooperation with other relevant institutions and organizations involved in water,
- To promote exchange of materials and references and dissemination of activity results in the water society,
- To research for conservation of water environment and culture and suggest to the community based on the research,
- To collect, archive and disseminated information related to water, and
- To perform as a think tank for the institutions and organizations as well as citizens' groups in the community, etc.
